Hi Hawra,

Congratulations on passing your defense! You should be able to save the email as a PDF and submit it to the graduate school as an additional document or as an appendix to your thesis. Let me know if that helps or you have more questions about showing proof of permission to the graduate school.

Hawra,

Yes, you are definitely on the safe side. Just send a copy of the email to the graduate school. Also, make a note in your dissertation that the text is also published elsewhere.

Dear Hawra Alghasham,

Thank you for contacting The Optical Society.

For the use of material from Hawra Algasham, Hira Farooq, Ceren Uzun, Sueli Skinner-Ramos, Ayrton A. Bernussi, and Luis Grave de Peralta, "Scanning diffracted-light photography using white-light and thermal radiation sources," Appl. Opt. 57, 9997-10003 (2018):

Because you are the author of the source paper from which you wish to reproduce material, OSA considers your requested use of its copyrighted materials to be permissible within the author rights granted in the Copyright Transfer Agreement submitted by the requester on acceptance for publication of his/her manuscript. If the entire article is being included, it is requested that the **Author Accepted Manuscript** (or preprint) version be the version included within the thesis and that a complete citation of the original material be included in any publication. This permission assumes that the material was not reproduced from another source when published in the original publication.

The **Author Accepted Manuscript** version is the preprint version of the article that was accepted for publication but not yet prepared and/or formatted by The Optical Society or its vendors.

While your publisher should be able to provide additional guidance, OSA prefers the below citation formats:

For citations in figure captions:

For images without captions:

Journal Vol. #, first page (year published) An example: Appl. Opt. 57, 9997 (2018)

Please let me know if you have any questions.

Kind Regards,

Rebecca Robinson
